

**Setiawan HADI**

### **Why am I here?**

During my stay at L3i, I will be working together with Jean-Christophe Burie on ancient manuscripts digitization and indexation, especially for Sundanese ancient manuscripts. One of our objectives is to publish a journal article related to that topic. Supporting is given by the SAME program of Minister of Research, Technology, and Higher Education (Kemenristekdikti) Republic of Indonesia.

I would be happy to discuss with members of L3i on any research topics, so feel free to contact me anytime.

I am invited at L3i by Jean-Christophe Burie and will be here **from 12/09/2018 to 30/11/2018**.

**Office:** 012 at ground floor

---

### **About me**

Setiawan Hadi is an Associate Professor at the Computer Science Department of Universitas Padjadjaran (Unpad) in Indonesia. He has received his master degree from the Computer Science Faculty of University of New Brunswick Canada in 1996, and, Ph.D. in Informatics from the Institut Teknologi Bandung (ITB) Indonesia in 2008. He works as lecturer and researcher since 1993 and currently is the Head of Computer Science Department in Unpad. His research interest is in the area related to digital media processing, especially in the interpretation of the semantic contents and knowledge retrieval in digital media (images and videos). He has performed research in (i) facial image detection and recognition, (ii) interpretation of semantic contents of digital images, (iii) interpretation of biomedical cancer images, and (iv) facial image expression detection. In the last three years, his research is in ancient manuscripts digitation and indexation through STIC-ASIA program with the University of La Rochelle in 2015.
